Summary

Junior Full-Stack Developer experienced in building web applications with React, Node.js, Express, and MongoDB, with a focus on secure APIs, data integrity, and maintainable architecture. Experienced in integrating AI capabilities and automation workflows, including document processing and batch content generation. Strong problem-solving and systems-thinking approach, with hands-on experience translating requirements into reliable full-stack solutions.

Work Experience

Full-Stack Developer

Sep 2026 – Nov 2026

Egyptian Space Agency (EgSA) • New Cairo

Training / Development Experience

- Contributed to an internal AI engineering platform, integrating frontend interfaces with backend services and external AI model providers.
- Implemented application functionality around authentication, authorization, permissions, project management, and persistent chat storage.
- Worked across frontend and backend layers to translate requirements into maintainable features while troubleshooting integration and data-flow issues.

Projects

Fullstack Developer

Jan 2026 – Feb 2026

PayChat | *https://github.com/mohamed-h-eng/PayChat.git*

Full-stack peer-to-peer digital wallet focused on transaction integrity and concurrent financial operations.

- Designed a double-entry ledger to maintain transaction integrity and prevent balance inconsistencies during concurrent transfers.
- Implemented IBAN-based transfers, spending limits, JWT authentication, token blacklisting, and role-based access control.
- Designed and deployed a 20+ endpoint RESTful API using Node.js, Express, and MongoDB with atomic database operations.

Fullstack Developer

May 2026 – Jun 2026

QuizRush | *https://github.com/mohamed-h-eng/QuizRush.git*

AI-powered quiz platform that transforms text and documents into shareable quizzes.

- Architected the Rush batch-generation feature as an independently hosted n8n workflow decoupled from the core backend.

- Built a document-ingestion and chunking pipeline to process source material while staying within AI model context limits.
- Orchestrated multi-step AI processing from raw input to structured quiz output, enabling batch generation rather than one quiz at a time.

Skills

Frontend
React, JavaScript, HTML, CSS, Responsize UI, Frontend Architecture

Backend
Node.js, Express.js, Restful APIs, API Design, Authentication, Authorization

Databases
MongoDB, Database Design, Atomic Operations, Data Integrity

AI & Automation
AI Model Integration, AI Workflows, n8n, Document Processing, Batch Processing

Security
JWT, Role-Based Access Control, Token Blacklisting, Secure Coding

Development
Git, GitHub, Problem Solving, Systems Thinking, Troubleshooting, Agile Development

Education

Digilians initiative (Awarded by NTI)
Dec 2025 – Sep 2026

Software Development | Associate's Degree

- https://digilians.gov.eg/
- Relevant training included software development fundamentals, frontend development and UX, backend development and databases, DevOps and cloud computing, AI-driven automation, advanced software development, and security.

Certificates

AWS Cloud Practitioner
Jul 2026

AWS

Meta Front-End Developer
May 2026

Coursera

JavaScript Programming with React, Node & MongoDB Specialization
Aug 2026

Coursera
